

Quick Guide — Windows Access Icons

Communicator 5

Mouse emulation is the act of moving the mouse cursor around the screen following a user's gaze as if the user was moving a mouse or other pointing device. Windows Access in Communicator 5 mimics mouse emulation and allows for interaction with sensory games such as Eye FX and Look to Learn. This document provides a reference for all icons associated to Windows Access in Communicator 5.

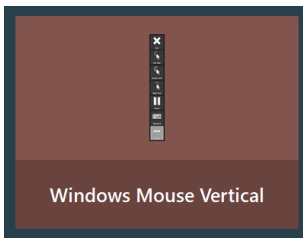

Locate the Windows Access Page Sets

In Tobii Dynavox Communicator 5, Windows Access page sets are in the **Text Communication > Windows Access** category.

Placement of Windows Access Toolbars

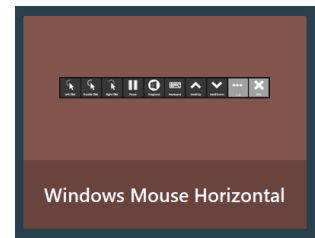

Three options are available for where to place the Windows Access toolbars:

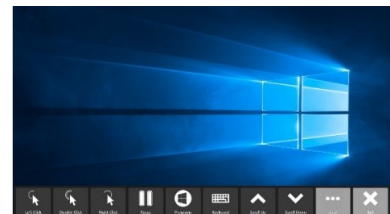

Windows Mouse Vertical – The toolbar shows on the left (default) or the right side of the screen.

Windows Mouse Floating – The toolbar shows on one of the 7 areas specified by the user: center, top left, top center (default), top right, bottom left, bottom center, and bottom right.

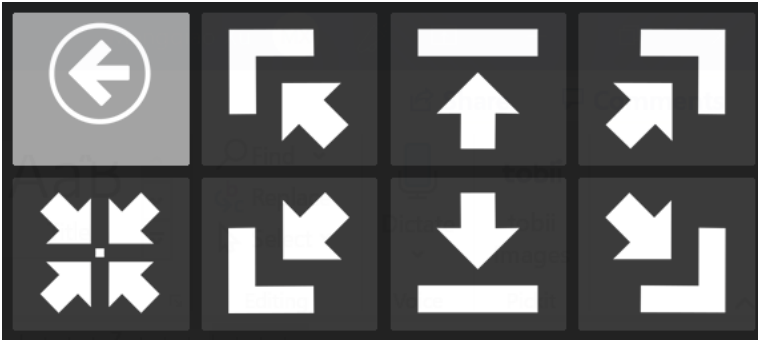

Windows Mouse Horizontal – The toolbar shows on the bottom (default) or the top of the screen.

Windows Access Icons
