# The power to break through boundaries

## I-Series+

The ultimate speech generating device  
with the world's #1 eye tracker

Power to be You

# Communication unbound

The Tobii Dynavox I-12+ and I-15+ are speech generating devices that enable effective communication in all forms – from voice output, to computer access, and even environmental control. The rugged design, unparalleled power management, and touch and gaze input supports are just a few of the features that makes the I-Series+ an ideal solution for those who rely on augmentative and alternative communication (AAC).

Corning Gorilla® Glass

9-hour hot swappable batteries

## Built purposefully for independence

with a durable and rugged design that withstands the demands of everyday life so you can go anywhere, anytime.

## Created to be the best

with the world's #1 eye tracker that gives consistent accuracy and freedom of movement for an optimal experience.

# The I-Series+ is designed with you in mind

## Designed to last

all day long with hot swappable batteries that provide 9-hours of run time so you never have to compromise.

## Project your voice

with confidence thanks to two integrated, outward-facing speakers that provide powerful sound and speech in any environment.

# The Tobii Dynavox Eye Tracking Advantage

Tobii Dynavox is the global pioneer of eye tracking technology, with over 15 years of dedicated research, experience, and innovation. The integrated IS4 eye tracker is based on numerous years of research and development as well as test data from millions of eyes across all types of users, ethnicities, eyewear, lighting conditions, and other environments. This knowledge has resulted in the most robust and best performing eye tracker in the world.

## High accuracy and precision

The I-Series+, together with the zoom functionality of Tobii Dynavox Gaze Selection, allows you to hit even the smallest targets on the screen, with consistent accuracy, again and again.

## Easy calibration

Our easy, one-time calibration is helpful for users who have difficulties keeping focus on a calibration target. It is a fantastic way for beginners to get started with eye tracking.

## Superior trackability

The I-Series+ provides high-quality tracking results for more people than any other system, regardless of most lighting conditions, eye color, or if you are wearing contacts or glasses.

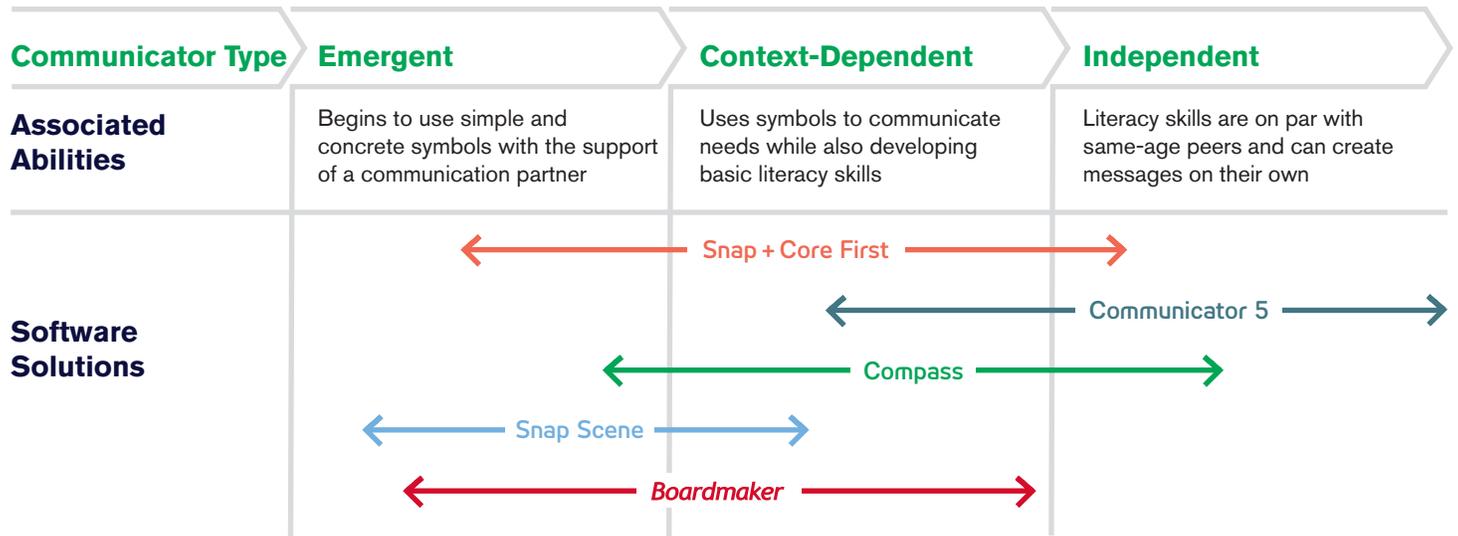

## Head movement compensation

Let your eyes move freely within the trackbox, the imaginary volume within which users can move their heads without losing accuracy. If you move outside of the trackbox, the I-Series+ will quickly find your eyes and continue to track them.

# Software solutions to meet all your communication needs

I-Series+ devices come with Snap + Core First and your choice of either Communicator 5 or Compass software. With all of these software choices, you have access to high quality male and female voices, along with various ages, languages, and accents. Also included is Snap Scene and Boardmaker Student Center.

**Snap™ + Core First®** is a symbol-based communication software that delivers a systematic, proven, research-based Core Word framework and lets users start communicating quickly and stay engaged as they grow and evolve.

**Communicator 5** is a software package that converts text and symbols into clear speech and offers easy-to-use tools for computer access. Great for users with intact language, like adults with ALS.

**Compass** provides powerful tools that help you communicate using the precise words needed. Features the Stroke and Brain Injury pageset.

**Snap Scene** is an instant scene-based language learning app that turns everyday moments into chances to learn and communicate naturally.

**Boardmaker Student Center App** is where students of all abilities can go to play activities assigned to them through Boardmaker Online.

The communication software included on the I-Series+ is supported by a free ecosystem of resources for continuous growth and support that include:

- myTobiiDynavox.com
- Pathways for Core First
- Discover Tobii Dynavox
- Trainings and webinars
