

Communicator 5

More efficient communication for all

Communicator 5 is a software package that helps individuals with communication disabilities communicate more efficiently. It comes with language content designed to match all Augmentative and Alternative Communication (AAC) needs, from emerging communication to literate adults. It converts text and symbols into clear speech and offers tools for computer access, long distance communication, environmental control, and more.

Communicate through symbols or text

with thousands of SymbolStix and PCS symbols for symbol-based communicators or with keyboards, dwell-free typing, and phrase prediction for literate users.

Be independent

and work in conjunction with Mouse Emulation and Gaze Selection by replacing the traditional mouse cursor with your gaze and hitting small targets for full computer access.

Communicator 5 gives you the power to...

Grow

with the option to choose the communication level (Emerging, Symbol, or Text) you believe to be most appropriate, then mix and match between pagesets as you progress.

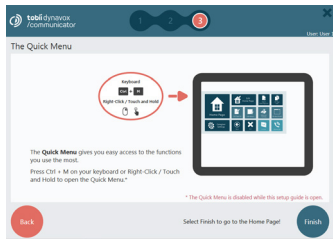

Stay connected

by using ready-made pages for Facebook, e-mail, text messaging, and more. IR-enabled devices, like your TV or lights, can also be easily programmed through the software.

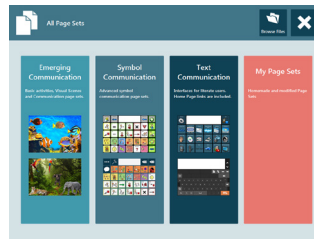

Communicator 5

Packed with new and improved features to make communication more efficient!

Easy, New “Out of the Box” Experience

You can be up and running in minutes with the Getting Started Guide

Three Communication Levels with New Content

Start out with the most appropriate page sets based on the user's level – Emerging, Symbol, or Text

Dwell-Free Typing

Dwell-free typing lets literate individuals who use eye gaze communicate much more efficiently than ever before and has the potential to increase communication speed

Quick Menu

Instant access to the most commonly used functions via the Quick Menu

Improved Email Setup and Management

Setup email in minutes and better manage your inbox

Improved Run View Editing

The improved run view mode (Edit Button) allows you to easily make simple changes to texts, images, and links

Improved On-Screen Keyboards

Choose a keyboard layout and it will stay consistent regardless of the page sets used

Simple and Intuitive Home Page Editing

Customizing the Home Page to meet specific needs is fast and easy

Import Existing Communicator 4 Content

Easily import Communicator 4 page sets so you can use content you've already made

myTobiiDynamox Community

Support resources and page sets are only a click away

For more information on all the new key features in Communicator 5, please visit tobiidynavox.com/communicator5

While specifically designed for the Tobii Dynamox I-Series+, Communicator 5 also works on Microsoft Windows computers running Windows 7 or newer.
