

# Snap + Core First®

The power to  
fulfill my potential

Learning language, achieving literacy, and becoming an independent communicator is a journey with many stages. Tobii Dynavox Snap + Core First® meets each communicator wherever they are on that journey and evolves with users as they grow. It is designed to be the most intuitive and engaging symbol-based software solution on the market so you don't have to worry about spending hours on setup or getting the right content in place – it's already done for you and is easier than ever to customize.

## Start communicating immediately

with tools and supports, like Core Words, Quickfires, and Topics, that allow a communicator to initiate and guide the interaction.

## Created to be the best

with years of research, feedback, and user testing SLPs and educators, 9 out of 10 tested preferred Snap over competitor apps.

## Snap + Core First is a companion for your literacy and learning journey

## Built for confidence

with the easiest navigation, no instructions are necessary and a toolbar is always available with tools to support you as you move around the system.

## Designed for easy customization and consistency

with a new user interface for easy editing and grid size changes, common functions for dragging and dropping, quicker actions for linking pages, and a new Search tool for finding words quickly.

# Core First and the power to pave your path to literacy

Core First is a pageset that is centered on Tobii Dynavox's systematic delivery of the Core Word framework, Topics, QuickFires, Behavior Supports, Word Lists, and Keyboards. Rooted in research by the University of North Carolina at Chapel Hill, Core First helps the communicator continuously build vocabulary and skills and takes advantage of motor learning by introducing new vocabulary systematically and purposefully. It is built on three pillars for communication success: growth, engagement, and literacy.

**How does it help users grow?** Core First was designed for you to move forward on your communication journey, and as you evolve, Core First will evolve with you – meaning you'll never lose what you've already learned as you unlock additional vocabulary and new concepts.

**Why is engagement important?** Core First allows its users to be engaged in quick, real-time conversation about the topics that are most important to them. Using the tools provided, communicators can participate, initiate, or even lead conversations with communication partners.

**Is literacy possible?** Yes! No matter your starting point, Core First will help you continuously learn new words, grow your skills, and build upon them – making literacy possible.

*"Snap + Core First is so fast and responsive! When you touch a symbol, you get immediate voice output. This ensures the motor, auditory, and visual input the user gets when they activate a button is simultaneous and that helps the child learn!"*

- SLP AND PROFESSOR FROM VANDERBILT UNIVERSITY
