Pathways for Core First®

The power to keep growing

Tobii Dynavox Pathways is a free, one-of-a-kind companion app for Core First® packed with expert advice for how to meaningfully impact user communication success and guide them on their journey to literacy and independence. Designed to facilitate successful use of Snap Core First software, Pathways is a unique learning gateway that will enhance your partner communication skills and features an interactive goal setting tool, lesson plans and materials, cheat sheets, and videos to help you make the biggest impact on user success.

Jumpstart your communication, language, and literacy goals

Engaging, simple to follow path for getting started

With an intuitive dashboard and Getting Started walkthrough videos, you can instantly get underway with examples supported by scripts and videos, all while encouraging communication and interaction.

### Quickly identify goals, then track and share progress

Use the interactive Goals Grid to determine the goals for users of all ability levels. Easily monitor and share progress, while advancing momentum moving forward with lesson plans to address every goal.

Expert lesson plans and tips with real-world video examples

Pathways for Core First shows you how to implement Snap Core First with real-world video examples for each lesson plan and materials.

Empowerment for communication partners

Communication is a two-way street, and being a good partner is even more important when your user's skills are developing. Pathways will teach you skills that are proven to facilitate engagement, communication, and language growth.

Power to be You

tobii dynavox
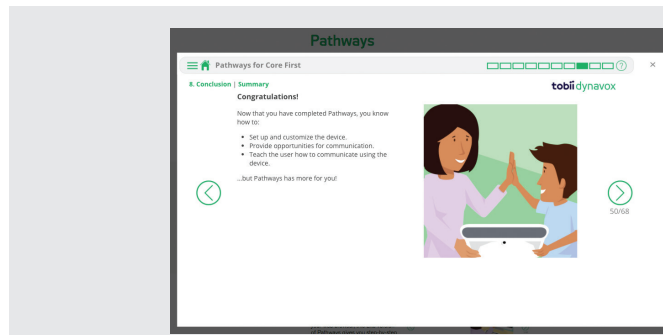

Stay engaged and excel with Pathways

Our goal for every communicator is to expand literacy skills, gain independence, and to encourage engagement. Pathways will show you, the communication partner, how to accomplish that, no matter how much or little experience you've had with augmentative and alternative communication.

Identify goals and track your progress

The Goals Grid provides functional goals addressing language skills, device operation, social skills, and strategies for repairing communication breakdown. These goals help you identify the user's starting skill level and which skills require more focus.

Lessons for every goal in the Goals Grid

Over 50 lessons are available for growing skills in a variety of areas. Find the lessons by selecting goals in the Goals Grid or directly through the Build Skills section. Additionally, the Encourage Positive Behavior section provides assistance for matching supports to specific behavioral challenges.

Pathways for Core First online

Pathways for Core First online is a web based companion guide to Snap Core First. Accessible directly from your web browser, this online version of Pathways gives you step-by-step instruction on how to quickly get up and running with Snap Core First.
